OFFICE AND HOME

Electric Height-Adjustable Desk Frames for the Office and Home

We are proud to offer a complete range of high-quality electric height-adjustable desk frames, ideal for both office and home environments. Our versatile frames come in configurations from single-leg to multileg setups, providing flexibility to suit any workspace.

Available in stylish white, black, and silver finishes, our frames are designed to complement any interior. Additionally, custom sizes and special colors are available upon request to meet your unique requirements.

For added convenience, you can choose to equip your desk with a battery pack or wheels, offering even more mobility and flexibility.

With stock readily available in the Netherlands, we ensure quick delivery, making it easy to enhance your workspace with our reliable, ergonomic solutions.

Exquisiteness

High-performance motor Smooth and stable movement. Safety functions Anti-collision and tilt sensors.

Possibility to set your own minimum and maximum height, including standard memory presets. No external software is required.

Strict performance and aging tests guarantee a reliable daily experience. Each leg is tested before leaving the factory.

Who is Flex Bench?

Since 2021, Flex Bench has been developing and distributing height-adjustable desk frames for modern and elegant offices. Our aim is to create solutions that optimally combine design, functionality, and efficiency.

Our product range is complemented by customized solutions that can also be implemented in medium-sized production runs – flexibly, precisely, and with a market focus.

Our product development takes place in close collaboration with our customers. Manufacturing is handled by long-standing, quality-assured partners in Asia.

Since 2026, Flex Bench has been part of the Ergoswiss Group. As a result, our customers benefit from an expanded product portfolio, an international sales network, and additional technical expertise – for comprehensive ergonomic workplace solutions.

MODULAR SET-UP

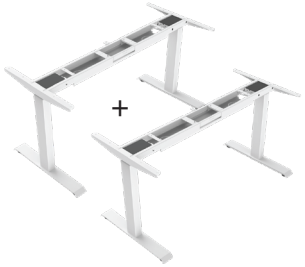
Expansion Options for Your Office Furniture

In addition to our standard office furniture program, we offer advanced solutions for controlling multiple frames simultaneously with various types of control boxes.

A great example is the FBC, which can be combined in both corner and linear configurations. With the optional extension set, even large and flexible setups are possible, perfectly tailored to your workspace. Discover the versatility and efficiency of our solutions!

Suitable for controlling 4 motors

Solution for large tabletops or heavy loads



Solution for a strong corner set-up

Solution for wide table tops

Frames, lifting columns, and control boxes in stock in Amersfoort!

- √ Daily delivery
- √ Individually packaged
- √ Fast and reliable

LIFTING COLUMNS

We offer a unique opportunity to fully customize your set-up.

Contact us, and we would be happy to discuss the options with you, allowing you to select the perfect leg set, choose from various leg shapes (round, oval, rectangular, or square), and determine the weight per column, stroke length, speed, and color.

Additionally, you can personalize your own display, ensuring the workbench meets your specific needs and preferences.

Accessoiries

Control boxes

We supply various types of control boxes, offering 1- to 4-leg control systems depending on the legs to be controlled—all available in stock.

Batterypack

Certain frames can be equipped with a battery. Please contact us for further information on the available options.

Control panels

All our frames come with the control unit specified in the product description. Various options are available upon request.

Castors

Upgrade your Flex-Bench with durable, smoothrolling wheels for easy mobility and stability— lockable when needed!

Cable trays

To keep your cables neatly organized, each frame requires a high-quality and tidy cable tray. Our trays are available in white, black, and silver. The tray is flexible in width, adjustable from 96 to 166 cm, and can be tilted and secured in two depth positions.
